Instruction for Installation

1 .Part of door installation

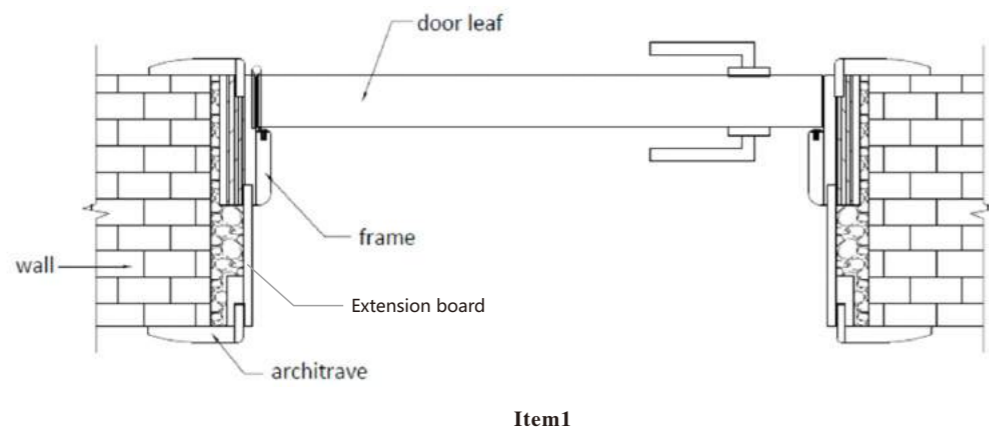

2 .Hardware

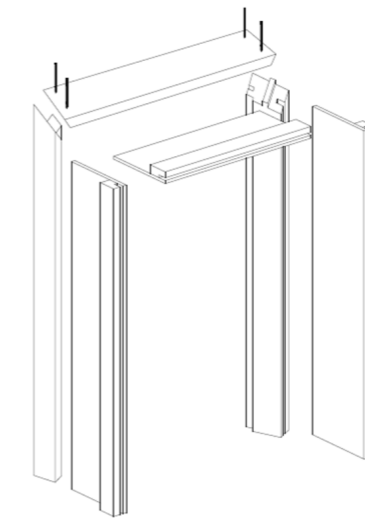

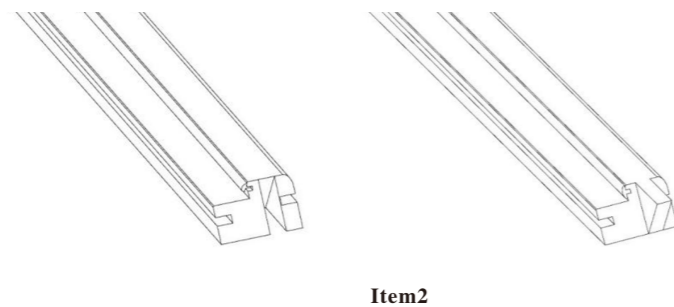

3 .Installation of frame and architrave

3.1 Installation complete diagram, as Item 1:

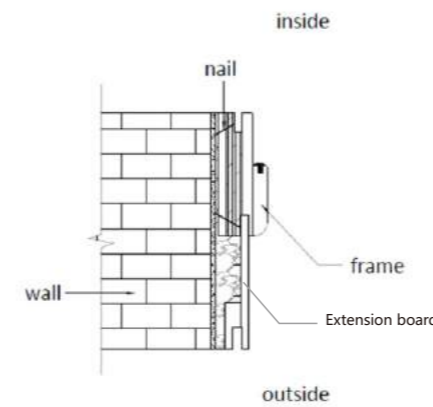

Step 1:
The frame using the 45 degree angle and groove joint ways, put the adjustable board into frame. as Item 2 and Item 3:

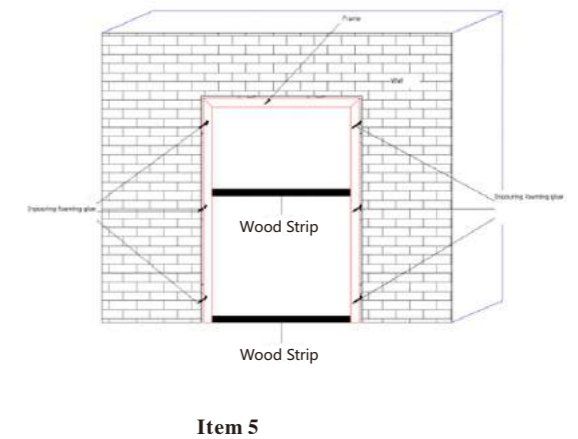

Item3

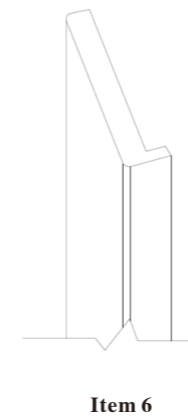

Step 2:
(1) Push the assembled frame into wall hole, keep it upright of both sides. Make the frame and wall fixed with nails. As Item 4.

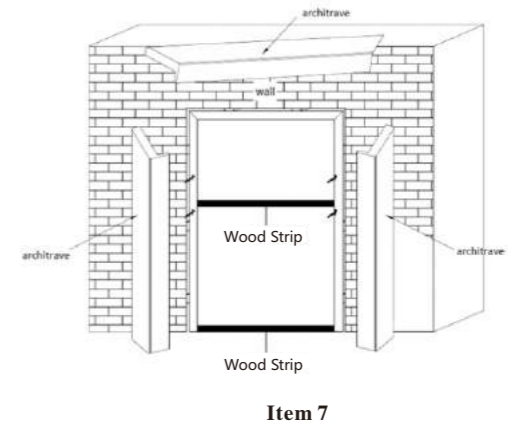

(2) Use a wood strip to support the frame and ensure it upright. Inpouring the foaming glue beside the frame and wall. As Item 5.

Step 3:
(1) Architrave need to be cut by small cutting machine according to the actual length. One end of the longer architrave should be cut as 45°. As Item 6 ;

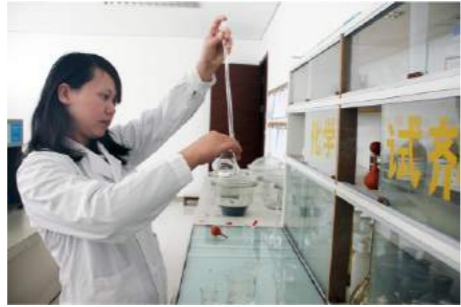

(2) Architrave also can adjust the wall thickness. Applying glass glue on the back of architraves, then fix with frame. As item 7:
